

Speaker 1: I have great healthcare from work, but even with it, there are things that could come up that I'm not protected against. Hospital stays can be very costly because of things my existing healthcare doesn't cover—and those unexpected expenses will be hard on my family financially. That's why Hospital Indemnity Insurance can be so important—it gives my family financial protection for the costs not covered by our medical insurance. When I needed to be admitted at the hospital¹ with appendicitis, there were extra out-of-pocket costs associated with that. But I got a lump sum payment, that I could use as I saw fit, on the things my healthcare didn't cover, like co-pays, deductibles, medical tests, and even out-of-network specialists. I feel more comfortable and confident that we have enough financial protection and flexibility thanks to MetLife Hospital Indemnity insurance, and you can, too. Enroll through work.
